

## L-221 Toilet Brush & Holder

Lovair L-221 is a stainless steel toilet brush with holder that can be wall-mounted.

The brush and holder is made from AISI 304 type stainless steel in either a brushed satin or mirror polished finish.

### Operation

The brush can simply be lifted out of the holder, and returned after use.

### Maintenance

The black plastic cup at the base of the holder should be inspected periodically for any water residue that may have collected from the brush. If necessary, the cup can be removed for emptying by pressing it downwards as it is a push-fit into the cylindrical holder.

### Cleaning

All grades of stainless steel will stain or discolour if due care and attention is not taken. The surface must be regularly cleaned to ensure a long service life of the brush & holder.

Use a soft cloth or sponge with a mild solution of soapy water as part of the regular washroom janitorial routine. Do not use abrasive or cream cleaners as these will damage the surface finish.

If the brush and holder are subjected to a highly chlorinated environment eg swimming pools or marine coastal locations, a further treatment, in addition to the regular cleaning as described above, is recommended by the application of a household cleaning product containing silicone.

**If further information is required, contact Lovair technical team for more detailed stainless steel care guidelines.**
